3 things

Past/annoyance
- chat
- earbuds

Present/Risk avoidance
- multimodal
- transparency

Future
- compute smoothing
- Drive down costs

Deliverables

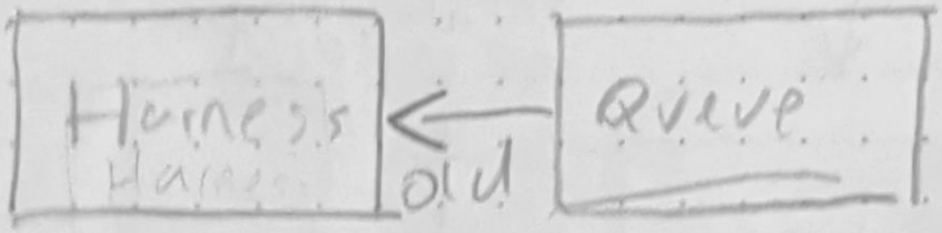

- open sourceable
  - can run on any device
- multithreading

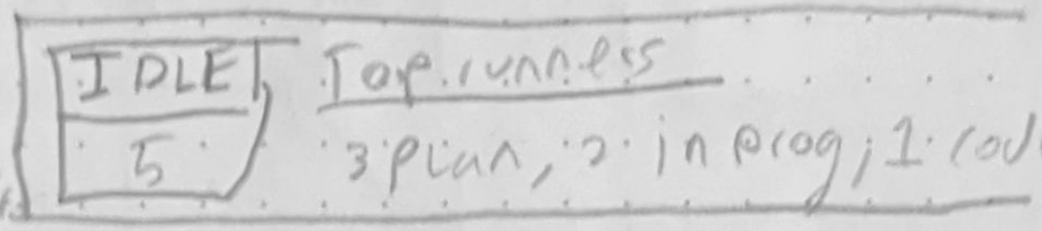

Integrate muse

Voice describe
- tickles

Generate prototype
- UI

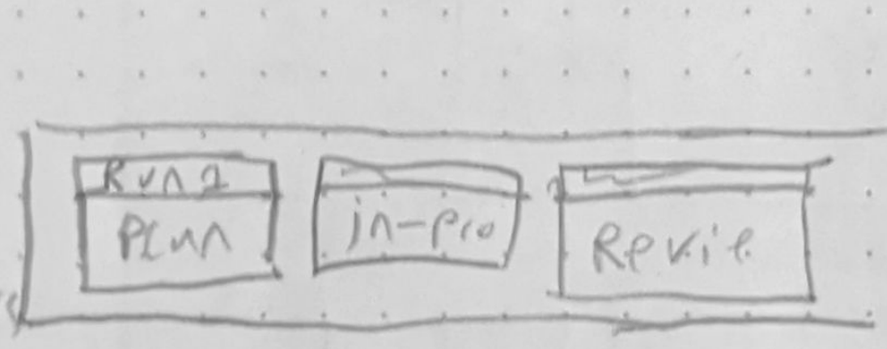

Queue pushes back to harness

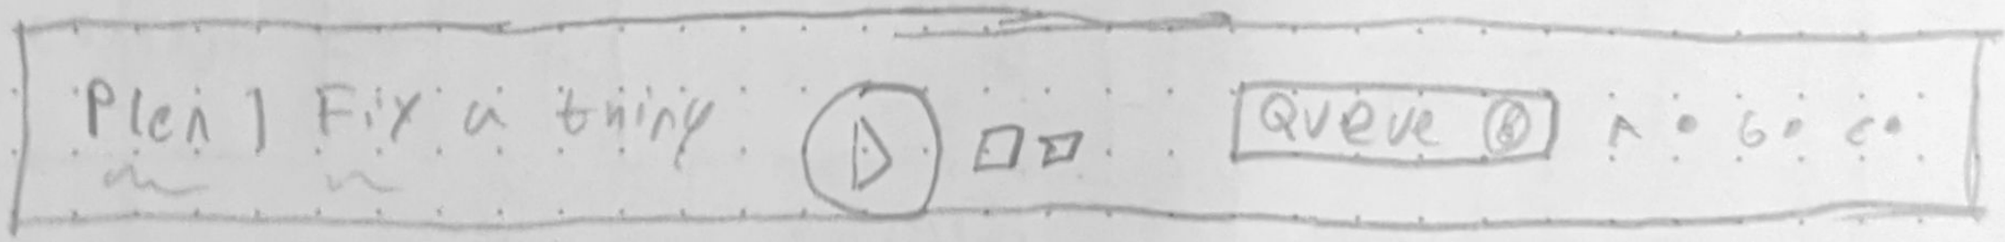

6+ Runners

< Above 5 runners

2-5 Runners

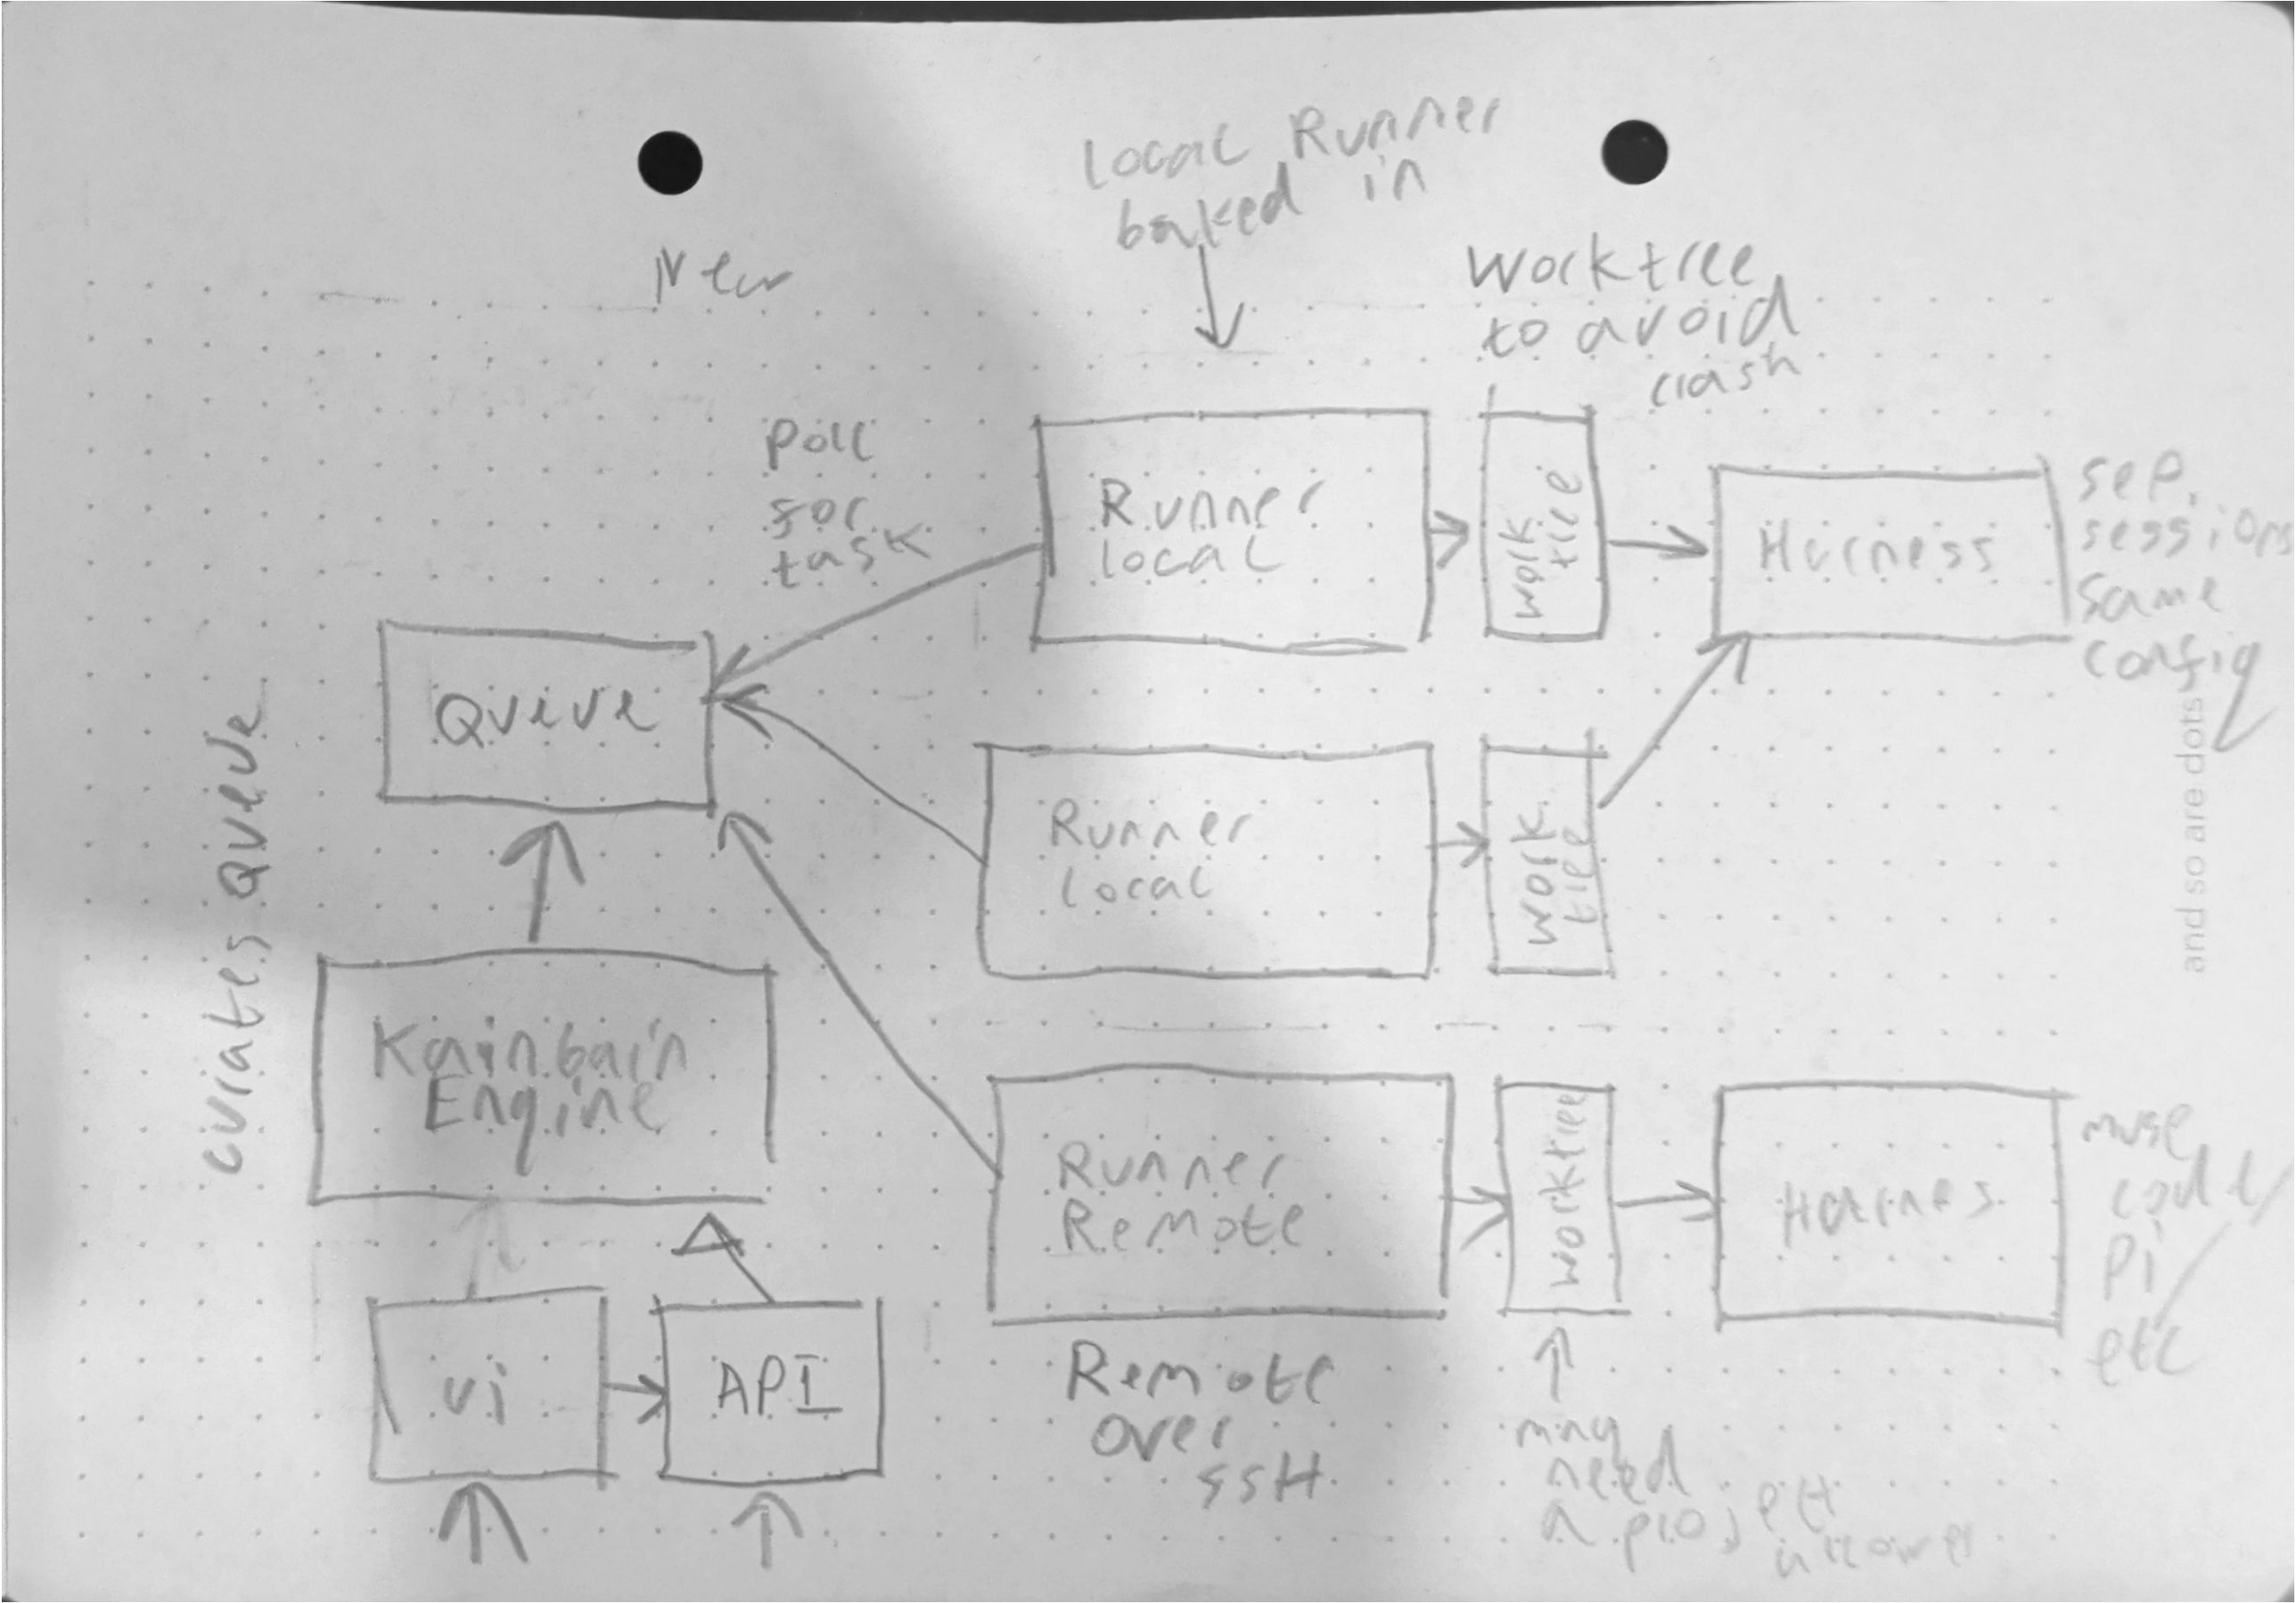

< for under 6 runners

1 Runner

current

and so are dots

Worker
Local Runner baked in
Worktree to avoid crash
Poll for task
Runner local
worktree
Harness
sep. sessions same config
and so are dots
Queue
curates queue
Kanban Engine
Runner local
worktree
vi
API
Runner Remote
Remote over ssh
worktree
Harness
may need ^p10 ptt in tmux
use cpu for pi etc
